ABOUT ME

Looking for an entry-level position in a reputed organization, Where I can polish all my skills that I have learned in the past few years. I'm a passionate newcomer with strong leadership abilities, and also eager to acquire new skills and approaches.

PROJECTS

Web Medical Management System (Running)
The undertaking is called a "Virtual Medicine Home." By using this application, patients can reserve online meetings with their preferred specialists.

Combination Lock Using Arduino
The project will help us to set combination of passwords and you can set a password by using 1-6 digits. Different LEDS are used to show the working of the password.

ASM Detection With Engine Locking System
ASM Detector was a hardware project designed to calculate the various factors like Alcohol, Smoke, Moisture and Temperature , which works by stopping the engine when the values of factors gone beyond the limits.

Tribute Page/ TO-DO List/ Calculator
I had designed all the three projects during my Virtual Internship at Oasis Infobyte. they involve Html, CSS, Javascript.

Portfolio
A portfolio is an organized visual collection of my progress, achievements, and efforts that demonstrates my accomplishments.

Guess the Number Game
It is a java based project in which the computer will play with user's mind in order to get the correct answer.
